Safety and Care Points for Snowshoe Use

1. The harness/binding should be opened and unbuckled completely when putting on or taking off the snowshoes.
2. Be sure to fit the harness snug around your boots to provide more secure fit of the snowshoe to your boot.
3. These snowshoes do not have crampons, or any other type of traction. They are designed for use on flat terrain. They are NOT designed for hills, packed snow, or icy conditions.
4. DO NOT step on edges (examples: edge of parking lot or roadway, parking bumpers, branches, rocks, or other objects that rise more than one inch from the surrounding terrain). Your body weight on the snowshoes over a gap between two objects may be enough to break the snowshoes.

I have read, or have had read to me, the above safety/care points prior to renting snowshoes from the Jackson County Conservation Board. I understand that by renting these snowshoes, I am assuming any and all risks associated with the use of these snowshoes whether by myself, or any other person who uses the snowshoes I have rented from the Jackson County Conservation Board. I hold harmless the Jackson County Conservation Board, its employees and representatives.
